SANDS' SARSAPARILLA,

FOR THE REMOVAL AND PERMANENT CURE OF ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD, or Habit of the system, viz:—

Scrofula, or King's Evil, Rheumatism, Obsolete Cutaneous Eruptions, Pimples, or Pustules on the Face, Itch, Scald Head, Chronic Sore Eyes, Ring Worm or Tetter, Scald Head, Enlargement and Pain of the Bones and Joints, Stubborn Ulcers, Syphilitic Symptoms, Sciacia, or Lumbago, and Diseases arising from an impure state of the blood. This valuable medicine is now used and universally approved by the most distinguished of the Medical Profession throughout our country, and by its intrinsic medicinal value, the public generally (but the afflicted particularly) have been unduly acquainted with its efficacy, in the removal and cure of diseases having their origin in an impure state of the blood. The SARSAPARILLA is combined with oil of sassafras, all of which are held in the highest estimation by the most distinguished physicians.

As a mild aperient, antiseptic and tonic, it contains the three most useful properties of medicine. It purges, purifies and restores. Scrofula, Cancer, Leprosy, all Ulcers and Scrofulous Sores, all Diseases of the Skin, and all internal disorders, no organic, but arising from a diseased circulation, give way before its hygienic influence. The following interesting case is presented, and the reader invited to its careful perusal. Comment on such evidence is unnecessary.

New York, April 22, 1846.

Messrs. A. B. & D. Sands: Gentlemen: Feeling it my duty to you and to the community at large, I send you this certificate of the all-healing virtues of your SARSAPARILLA, that others who are now suffering may be cured, and the confidence established and your medicine without delay.

I was troubled with a severe ulcer on my ankle, which extended half way up to the knee, discharging very offensive matter, itching, burning, and depriving me of my rest at night, and very painful to bear.

I was recommended to use your SARSAPARILLA by Mr. J. M. McCall, who had been cured by it, and after using five bottles I was completely cured.

I have delayed sending you this certificate for one year, because the cure was effected so slowly, in order to ascertain with certainty whether it was a permanent cure, and it now gives me the greatest pleasure to add that I have never seen nor felt the slightest recurrence of it, and that I am entirely well.

Yours very truly, SARAH MINTREY.

240 Delancey street, New York.

MONROE, Ala. Nov. 28, 1845.

Messrs. SANDS:—I deem it an act of justice to myself and the community at large, to relate the following fact, which occurred in our neighborhood in the latter part of July last. Jane C., a young girl aged fourteen years, was afflicted with an immense sore on the middle of her back, which defied all the treatment of medical skill.

My friend, Mr. J. M. McCall, who I employed as the means in my power endeavoring to relieve her, but in vain. At last some person mentioned to me your SARSAPARILLA, and I immediately procured two bottles of Messrs. Sands' and Tucker's, your Agents, in this city, which I gave to her. I called to see her the next day, and she told me she commenced using it, and very much relieved.

I laughed immoderately at this, but she said it was really so, and, gentlemen, in a word, in two weeks from the time she commenced using it, the sore was neither sign nor appearance of where the sore had been.

Yours, respectfully,

J. G. HOUSMAN, 93 Dauphin-street.

For further particulars and conclusive evidence of its superior value and efficacy, see pamphlets, which may be obtained of Agents gratis.

Prepared and sold, wholesale and retail, by A. B. & D. SANDS, Wholesale Druggists, 100 Fulton-st. N. Y. Sold also by Wm. Shaw, Wilmington; E. J. Hale, Fayetteville; J. Deane, Newberry; William Day, Dover; G. C. Hall, N. C.; E. B. Rothman, Georgetown, S. C.; C. H. Haviland, Harrell & Allen, Charleston, S. C.; and by Druggists generally throughout the United States. Price, \$1 per bottle; six bottles for \$5.

It is the public are respectfully requested to remember that this SARSAPARILLA is a constant and constant achievement, such remarkable cures of the most difficult class of diseases to which the human frame is subject; therefore ask for Sands' SARSAPARILLA, and take no other.

BY ROBERT L. B. BARKER.

Respectfully dedicated to those patriots who are throwing aside party distinctions to defend our common country against Mexican aggression.

At a "New Hall Columbia."

Wake, Columbia, wake sublime

Music of the olden time!

Music of the drum and fife,

Rousing to the battle strife.

Music calls to victory,

As the warriors fight and die!

Wave, Columbia, wave on high,

Loveliest banner of the sky!

Flag of many a bloody field,

Never in the end to yield.

Wave its stripes and stars to show

Patriots bleed, but never bow!

Spread, Columbia, spread the flames,

Revolutionary flames!

"Hear the mighty dead declare:

"Recall those sons you are!"

Let the answer echoing be:

"DEATH or glorious VICTORY!"

Wake, Columbia, wake the might,

Britons learned to judge aright.

On the land, and on the sea,

Burning tyrant chains away!

Let the growing giant proclaim

Nobler deeds and nobler name!

Let, Columbia, let the South

AGRICULTURAL.
Hay making.—Why not adopt the same rule in regard to the time for cutting clover and grass for hay, that is followed in cutting medicinal herbs? The object in both cases is to secure the intrinsic virtues of the plant. In curing herbs, as all acquainted with the subject admit, the most proper time for cutting is when they are in full bloom—and it is also admitted that they should be cured in the shade; because if exposed to the more direct influence of the sun and air, some of their valuable properties would be evaporated.
We know there is some difference of opinion in regard to the proper time for cutting grass. The advocates for ripe hay contend that there is more substance in it, and that it will go farther in feeding stock than that cut while in blossom. And so we suppose there is still more substance in scrub oak brush, and that it would go still farther in feeding (not supporting) stock. Admitting there is more substance in wild grass, is it a kind of substance which affords more nourishment to animals.

Plants, at the time of flowering, contain starch, gum and sugar; all of which are known to nourish animals. In the formation of seed, the stems and leaves are exhausted of these substances, and the substance which remains is chiefly woody fibre. But it may be said that the composition of woody fibre, starch and gum are nearly the same. Admitted; but this does not prove that animals are able to extract nearly an equal amount of nourishment from each. The composition of the diamond, the hardest of all substances, may be said to be similar to that of starch, gum, &c., carbon being the chief element of all; but the digestive organs of animals would hardly be able to convert the diamond into organized tissue. And though woody fibre, if eaten by cattle or sheep, might 'stick by the ribs,' we think the ribs would not acquire much fat from it or the system much strength.

In some parts of the country, animals are actually fattened for market on hay alone. This may sound strange to those who feed their stock only with clover and timothy which has gone to seed; for we presume their stock was never thus fattened. But where this object is attained, the grass is cut while it is quite green—not past bloom—and there made and preserved with great care. It is true that there are some kinds of grass, as the 'spire grass' or 'Kentucky blue grass,' which make but little bulk in seed-stalks, the chief growth consisting of leaves that spring from the root. The greatest value in fodder would be obtained in such cases by allowing the crop to grow till it had acquired its greatest bulk. This remark, however, by no means applies to clover, timothy, or the grasses usually cultivated for hay.

In making hay, we would expose it to the sun and air no more than is necessary to effect its preservation, for the same reason that is above given concerning herbs. Clover can be cured, indeed it is more conveniently cured, with but very little exposure to the sun. If it is not wet and is thoroughly wilted, it may be put with forks into cocks, which will weigh, when dry, about fifty pounds each, and they will effectually cure. Timothy, also, may be cured in this manner. The finer grasses, when thrown into a body, pack more closely, and afford less space for the air; consequently they require to be more thinly spread in making.

Excepting with clover, which we never spread out of swath, our practice has been to spread out the swaths as evenly as possible, if the burden is stout, as soon as the dew is off; in the afternoon rake and cock it before the dew falls. We prefer putting it in cocks, even if it was no more than wilted, because the sweating it will there undergo in the course of twelve hours, will much facilitate the making, and if the grass is coarse and hard, it will render it much more soft. Besides, hay that has been well sweated in cock is not liable to ferment in the stock or mow.

Whether the hay which was mowed and put in cocks the first day will make so that it will do to go to the barn on the second day, depends of course on its condition, and the state of the weather. If all appearances indicate that the hay can be made sufficiently on the second day, (and repeated observations only can determine the degree of dryness which is required,) open the cocks and shake the hay out lightly, thoroughly breaking all the locks with the forks. But it should not lay spread out later than three or four o'clock in the afternoon, but should be put up again, or, if dry enough, put in the barn by this time, lest it should contract moisture. If from the condition of the hay or the appearance of the weather, there is any probability that the hay cannot be made enough in one day, let it remain undisturbed till the weather is favorable.

There are one or two other considerations in favor of early cutting, which we omitted to notice above. It is admitted by physiologists that plants exhaust both their own energies and the soil, more in forming seed than in the whole preceding portion of their growth. Thus when grass is suffered to ripen, it gives but little after growth, and from the exhaustion mentioned, it quickly dries out.

Albany Cultivator.
After Scott's works, a beautiful giving directions to the stock. If there is anything about it, it is the rule of charity to give it.

DAGUERRETYPE MINIATURES.
MR. HUMPHREY would respectfully announce to the citizens of Wilmington, that he purposes remaining in this place a short time, and of giving all an opportunity of procuring a correct likeness of themselves and friends in his superior style.
Having connection with three of the most successful Daguerreotype Rooms in the State of New York, he has advantages which but few artists can realize.
Portraits taken in a superior style, perfectly true to nature, of very fine tone, gilded and colored so that no climate will effect them in the least. Daguerreotypes taken by the old process, gilded and colored so as to render them equal to those taken at the present day.
Portraits of sick or deceased persons taken at their residences if required.
Particular attention given to those wishing to engage in the business. Instruction with all the latest improvements, apparatus and stock, furnished on reasonable terms.
For further information inquire at his room, on Front street up stairs adjoining Dr. Ware's, directly opposite the Chronicle Office.

J. T. SCHONWALD, BOTANIC PHYSICIAN.
WOULD take this opportunity of expressing his gratitude to the citizens of Wilmington and its vicinity, for the liberal patronage he has heretofore received, and hopes by strict attention to his profession, to merit the support of the community.
He continues to keep on hand a large stock of Botanic Medicines, of his own manufacture, such as remedies for Consumption, Coughs, Colds, Croup, Whooping Cough, Cholera, Cholera Morbus, Cholera Infantum, Cholera, Gravel, Liver and Spleen Complaints, Dyspepsia, Rheumatism, sick Head-ache, Piles, Nervous diseases, Worms, Tetters, and all diseases of the Skin, Itch, Scrofula, all kinds of Fevers, &c. &c.
These remedies are all of purely Vegetable composition, and are universally known to possess virtues that have never been excelled by any series of Medicines ever offered to the public.
Charles C. Rhinehardt's PATENT GLASS PAD
Double and Single Layer Truss, for HERNIA.
Dr. J. T. S. has on hand, and offers for sale, at manufacturer's prices, a large supply of the above Truss, consisting of eighteen different shapes and all sizes. They are pronounced by all who have used them to be superior to any Truss ever before invented. He feels confident that a trial of the above Truss will satisfy any person of its superiority.
The above medicines are for sale in Princess street, near Rankin & Martin's Auction and Commission Store, at wholesale and retail.

To the Friends of Humanity.
THE PHILANTHROPIST
IS the title of a monthly sheet, proposed to be issued in Wilmington, N. C., at one dollar a year, payable on receipt of the first number.
Intemperance, the great enemy to prosperity and happiness, is exerting a wide influence throughout the country. It is a growing evil, and is daily destroying the lives, to say nothing of the comforts, of thousands of the human family, notwithstanding the efforts that have been made, and are still being made, towards its suppression. One principal reason why this great evil is still permitted to exist to an alarming extent, is that the exertions of the friends of the Temperance cause have been confined principally to cities and towns, while villages and the country at large, are almost entirely neglected. A cheap temperance newspaper, in the way of patronage, and if extensively circulated, would doubtless prove a barrier, in no small degree, to the progress of intemperance—thus carrying out successfully, the praiseworthy intentions of the friends of Temperance, which could not be accomplished in any other way. This publication, besides proving
A Foe to the Grogger,
and the disgraceful habits of drunkenness, will, at the same time, afford a variety of other matter, of a distinct nature.
In North Carolina no paper of this description has ever made its appearance, (although proposals have recently been issued for the purpose,) owing, no doubt, to the fact that the influence necessary to promote the success of a work of this kind, has been omitted. An anxious appeal is made to the friends of the cause generally, to use their utmost endeavors to give encouragement to this publication. The first number of the *Philanthropist* will make its appearance as soon as 600 subscribers can be obtained, which can be done if every influential person would feel a sufficient interest in the cause of Temperance, to exert himself.—The *Philanthropist* will be printed on a medium sheet, in newspaper form, so as to afford a privilege to advertisers.
Persons disposed to patronize this work, are requested to forward their names to Wilmington, by mail or otherwise, by the first of August next, addressed to the
EDITOR OF THE PHILANTHROPIST.
Editors of papers throughout the State will please give the above a few insertions, with some remarks of their own by way of recommendation.

ALL-HEALING.
JAMES A. BUNTING, Front Street, opposite the Chronicle office, WILMINGTON, N. C.
THE preceding figure is given to represent the INSURABLE PERFECTION. It is the great Evacuator for the impurities of the body. It will be noticed that a thick clear mucus flows from all points of the surface, which indicates that this perspiration flows uninterrupted when we are in health, but ceases when we are sick. Life cannot be sustained without it. It is thrown out from the blood and other juices of the body, and disposes by its means, of nearly all the impurities within us. The language of Scripture is, "In the BLOOD is the life." If it ever becomes impure, it may be traced directly to the stoppage of the Insensible Perspiration. Thus we see, all that is necessary when the blood is stagnant or infected, is to open the pores, and it relieves itself from all impurities naturally. Its own heat and vitality are sufficient, without one particle of medicine, except to open the pores upon the surface. Thus we see the folly of taking so much internal remedies. All physicians, however, direct their efforts to restore the Insensible Perspiration. The Thompsonian, for instance, creates the Hydrated Bromide as a secret blanket, the Homoeopathic deals out infinitesimally the Phosphoric acids and does us with mercury, and the blistering Quack gorges us with pills, pills, pills. To give some idea of the amount of the Insensible Perspiration, we will state that the learned Dr. Leuwenhoek ascertained that five-eighths of all we receive into the stomach, passed out of the pores in the form of this perspiration. It is a fact that we lose from the pores of the body, and drink eight pints per day, we evacuate five pints of it by the Insensible Perspiration. This is one of the most important remedies.
